Sun Valley is a leading national supplier of cut flowers. Dedicated to conscientious and efficient processes from bulb selection through growth, harvest and handling, Sun Valley strives to produce flowers of consistent quality and beauty. All of Sun Valley's farm locations are Veriflora™ certified for socially and environmentally responsible practices.

Headquartered in Arcata, with additional farms in Willow Creek and in Oxnard, a variety of growing conditions are able to produce a wide choice of flowers. Arcata is the ideal environment for growing bulb flowers due to its mild winters, cool summers, generous humidity and moderate coastal sunlight. Willow Creek crops thrive in the hot summer weather of the Northern California Coast Range. The Oxnard farm produces a wide range of field crops in the warm and mild weather of the Southern California Coast. These all provide the myriad of flowers used by Sun Valley's bouquet division, Sun Pacific Bouquet. West Coast Evergreen division adds high quality greenery from the Pacific Northwest.

Sun Valley ships flowers every day throughout the United States and Canada.

LILIES - Young starts in the Greenhouse
